

Origin of the Whiting surname

The Whiting surname first appeared in England and then migrated to the United States, Canada, New Zealand and Australia. To see maps of where Whittings are located around the world, see “Where in the world are all the Whittings?” on this website.

According to one source, the first known use of the name Whiting was in the 15th century and came from Middle English.

There are differing opinions on the origin of surname itself. Some link the surname to a marine food fish of that name found in European waters, especially abundant in the North Sea. Because of this possible link, we have chosen the following our logo.
